

Dear Members of the FCC,

I am opposed to the proposal (RM-10051) made by SAVI Technologies as part of ET Docket 01-278. If allowed, it would render a large portion of the 70cm amateur radio band largely unusable. Please help protect the radio spectrum we, as licensed amateur radio operators, use for communication (including emergency communications) from harmful interference. Thank you in advance.

Sincerely,

Martin H. Leider, AC9Z  
Lake in the Hills, IL
